DETAILED ACTION

Allowable Subject Matter

Claims 1-13 are allowable.

The following is an examiner's statement of reasons for allowance: Upon conclusion of a comprehensive search of the pertinent prior art, the Examiner indicates that the claims are allowable. Patentability exists, at least in part, with the signal processing module forming at least a portion of the first EMI absorbing main wall, and, the signal processing module and the motherboard each having mating connector parts. US Patents 6748154, 5880930, 6166919, 6671183, 4837664, 5414597, 6219239 are all cited as teaching various embodiments of electronic circuit units comprising first and second opposing main walls including EMI absorbing material, a motherboard frame, a generally planar motherboard and locating retainers on the motherboard frame. The cited references however, do not teach or suggest all the limitations as claimed by the Applicants. Nowhere in the prior art is there a combination alone, or, in part, that teaches or suggests all the limitations as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dameon E Levi whose telephone number is (571) 272-2105. The examiner can normally be reached on Mon.-Fri. (9:00 - 5:00).
